ABOUT ME

I enjoy travelling and take about two trips a year. I am also very focused on sports, going to the gym three times a week, and I love to read and listen to music every day. At the age of 23, driven by a thirst for knowledge and a desire to succeed, I enrolled in college to pursue a degree in Business Management as a student worker, which further enhanced my skills and abilities. After careful consideration and self-reflection, concluded that I needed to make a change in my career path and explore the endless possibilities and growth opportunities that the tech industry has to offer. I have always enjoyed solving logical and complex tasks, and the tech industry seems the perfect fit for me.
